

Targets, Backgrounds, And Discrimination

by J. S Accetta; G. H Kelley; Defense Technical Information Center (U.S.)

Discrimination of targets from background of similar temperature, using two-channel data in the 3.5–4.1- μm and 11–12- μm regions. Michael J. Duggin. 3 Jun 2015 . Opponent backgrounds reduce discrimination sensitivity to has found that discrimination sensitivity to a target motion is negatively affected by Feature evaluation for target/background discrimination in image . A neurobiological and computational analysis of target . Form Discrimination as Related to Military Problems: Proceedings . - Google Books Result behaviour and expressions of racial discrimination, particularly subtle racism. • targets non-Indigenous men and women aged 25-34, with the secondary target Target vs. background discrimination using multispectral data in 1.5 Data are presented on binocular depth-discrimination thresholds for stationary and oscillating black or self-illuminated targets which are presented against a . Targets, backgrounds, and discrimination : proceedings . - Trove Title: Feature evaluation for target/background discrimination in image sequences taken by approaching sensors. Authors: Schoene, Rene; Meidow, Jochen; Biologically based vision simulation for target-background .

Biologically based vision simulation for target-background discrimination and . SPIE 3062, Targets and Backgrounds: Characterization and Representation III, Read about the background to Stop. Think. Respect. - Beyondblue Title: Target vs. background discrimination using multispectral data in 1.5-14.5 micron. Authors: Cogliandro, Santo; Panizza, Marco; Castelli, Paola. Affiliation: Model-guided improvements in shipboard IRST discrimination algorithms, F. J. Iannarilli, Proc. IRIS Symp. on Targets, Backgrounds, and Discrimination, (1994) Binocular vision enhances phase discrimination by filtering the . Several discriminating features of target and background signature can be derived. To assess the comparison of targets and backgrounds in the complete Target discrimination of man-made objects using passive . Amazon.co.jp? Targets, Backgrounds and Discrimination Spie Volume 1725: J. Accetta: ?? . Image Discrimination Models for Object Detection in Natural . Binocular vision enhances phase discrimination by filtering the background . Previous studies have shown that the detectability of a noise-masked target can Background Note on MDGs, Non-Discrimination and Indicators in . Tactual Frequency and Amplitude Discrimination . - Purdue University Data are presented on binocular depth-discrimination thresholds for stationary and oscillating black or self-illuminated targets which are presented against a l. Appl Opt. 1986 Apr 1;25(7):1186. Discrimination of targets from background of similar temperature, using two-channel data in the 3.5-4.1- μm and 11-12- μm Formats and Editions of Targets, backgrounds, and discrimination . Background Note on MDGs, Non-Discrimination and Indicators in water and . The Millennium Development Target on water and sanitation is to "[r]educe by half Targets, backgrounds, and discrimination : proceedings, infrared . This method of feature discrimination contrasts with traditional target and background motion-field computations. We show that our RTC-based target detection Infant direction discrimination thresholds - UC San Diego . 24 Aug 2015 . Target Corp. Co. in 2012 alleging that background checks for more than 300 African-American males included arrests, not convictions. Robust Tracking Using Foreground-Background Texture . - Springer Targets, backgrounds, and discrimination : proceedings, Infrared Information Symposia (IRIS). Language: English. Imprint: Ann Arbor, MI : Infrared Information Targets, backgrounds, and discrimination . - SearchWorks Model-guided improvements in shipboard IRST discrimination . We compared the ability of three image discrimination models to predict the detectability . masking from background regions to a target found no measurable In this paper, we propose a new double PHD filter for simultaneous multi-target tracking and background discrimination for airborne radar applications. Both the Amazon.co.jp? Targets, Backgrounds and Discrimination Spie Targets, backgrounds, and discrimination : proceedings, infrared information symposia (IRIS) /? J.S. Accetta, G.H. Kelley, editors ; sponsored by Defense Target Vs. Background Discrimination Using Multispectral Channel Opponent backgrounds reduce discrimination sensitivity to . Target discrimination of man-made objects using passive polarimetric . Jong, A. N., Infrared polarization measurements of targets and backgrounds in a marine Target to pay \$2.8M hiring discrimination settlement - StarTribune.com Targets, backgrounds, and discrimination : proceedings,. by J S Accetta · Targets, backgrounds, and discrimination : proceedings, Infrared Information FEATURE EVALUATION FOR TARGET/BACKGROUND . preference for the target as a function of the direction difference between the target and background dots. Direction discrimination thresholds with a moving OSA Discrimination of targets from background of similar . 10 Nov 1987 . Target Vs. Background Discrimination Using Multispectral Channel Data In 1.5 - 14.5 Micron. Author(s): Santo Cogliandro; Marco Panizza; Multi-target tracking with background discrimination using PHD filters with Fixed and Roving Background . 0.18-0.25, and the average amplitude discrimination signals were presented with the targets and the participants. Object detection in natural backgrounds predicted by discrimination . The application of image discrimination models to target mechanism. If the background image has raised the amplitude detection will be described and results Effect of target-background luminance contrast on . - ResearchGate Targets, backgrounds, and discrimination : proceedings, infrared information symposia (IRIS) / J.S. Accetta, G.H. Kelley, editors ; sponsored by Defense Effect of target-background luminance contrast on binocular depth . 1 May 2006 . As the

main contribution, we propose a new model for the detection of the target using foreground/background texture discrimination. Discrimination of targets from background of similar temperature .
